Unpacking
Inspect this product immediately upon receipt. If you find damage, notify the delivering carrier immediately to begin the claims process. Carriers have the right to refuse claims for the damage if they are not notified immediately.

Packing List
Take care when unpacking to ensure that all items are accounted for and that nothing is discarded with packaging.

WARNING
Death, asphyxiation, and serious injury can occur if toxic or flammable gasses are present.
- Test manholes for gases before using the Smoke Blower.
- Ventilate the manhole if toxic or flammable gases are present.
- Observe all state and federal regulations if entering a manhole.
- If the sewer system has hazardous gases from sewage or solvents, the Smoke Blower may push them into the adjacent manhole during operation. Test for gases again if you plan on entering the manhole after the smoke testing operation.
NOTICE

Engine is shipped without oil.

Fill engine with oil to level indicated on dipstick before attempting to start engine.

Failure to fill engine with oil before starting engine will result in engine failure and will void warranty.

Turn fuel supply valve to “OFF” position before transporting unit.

Vibration during transport may cause fuel to drain into engine cylinder and crankcase. This may damage the engine due to improper lubrication or cause damage to engine components due to an overfilled crankcase or engine cylinder.
DESCRIPTION

THE HOUSING: A light weight, corrosion-resistant, cast aluminum housing locates the Smoke Blower over the manhole. The housing provides a sturdy platform for the engine and seals the manhole opening. The impeller area is totally enclosed by wire guards, preventing entry of large objects or debris and provides personal protection from the rotating impeller. The two top mounted handles make handling easy. A ½” thick foam pad attached to the underside of the flange minimizes noise and vibration and prevents excess movement of the unit during operation.

THE ENGINE: The 5.5 horsepower gasoline engine is equipped with a convenient vertical pull recoil starter and top mounted oil fill/dipstick.

THE IMPELLER: The 16” diameter impeller is designed for high performance and can produce (at the maximum rated engine speed) a free flow of over 4000 cubic feet per minute. The impeller is composed of a two piece cast aluminum assembly and 10 chemical resistant polypropylene airfoil style blades. The impeller is attached to a cast aluminum hub.

SAFETY

1. Do not operate the unit over occupied manholes. The high velocity air moving through the manhole may pick up and accelerate dirt and debris, causing injury. The Smoke Blower may also draw toxic or flammable gases to the manhole that were previously undetected.
2. Do not operate the Smoke Blower in the presence of gases or liquids that are flammable or toxic. This unit is capable of moving large volumes of air within the sewer system. The engine can ignite flammable gases and liquids.
3. Do not operate the unit with the guards loose or removed. The guards protect operators from the rotating impeller. The guards also aid in preventing objects and debris from entering the impeller area.
4. Do not operate the Smoke Blower if it vibrates excessively. The impeller assembly is well balanced. The only vibration should be what is typical for a small gasoline engine. Any excessive vibrations may indicate a potentially serious and dangerous problem.
5. Never operate the Smoke Blower unless it is properly installed in a manhole. Operation under any other condition could cause an unstable platform, excess vibration and entry of debris into the Smoke Blower unit.
6. Always wear a safety hat, safety glasses and ear protection while operating the Smoke Blower.
7. Keep the impeller area free of foreign objects and debris. Severe damage could occur given the high rotating speeds and small clearance between the housing and impeller.
8. Stand clear after starting the unit. The high velocity air created by the Smoke Blower may pick up, accelerate and discharge dirt and debris that could injure the operator.
9. Observe all state and federal regulations if entering a manhole.
10. Frequently check for loose fasteners before, during and after operation.
11. Follow all instructions and warnings provided by the engine manufacturer regarding safety, operation and maintenance.
INSTRUCTIONS FOR USING A CHERNE SMOKE BLOWER

INSTALLATION AND OPERATION

1. Remove the manhole cover from the pipeline to be tested.

2. Place the unit onto the open manhole.

3. Start the engine, making sure to follow the engine manufacturer’s instructions.

4. Ignite the smoke generation device and place it in the holding box mounted on the unit. Close smoke box lid.

5. Monitor the area for smoke leakage.

6. Stop the engine according to the manufacturer’s instructions.
Replacement Parts List

Please only list the replaceable parts with artwork that calls them out, and not the complete BOM and drawing.

CONVERTING TO A LINE STRINGER

The smoke Blower is a multipurpose unit. It can be converted to draw air for use in a line stringing operations. The conversion is done by simply changing the impeller. A new line stringer impeller can be ordered directly from Cherne by requesting part number 014-714.

Follow the Impeller Removal and Installation instruction below to properly change impellers.

IMPELLER REMOVAL AND INSTALLATION

NOTICE: Remove the wire from the spark plug and attach it to the retaining post. Reattach the wire to the spark plug when conversion is completed.

1. Remove the three (3) 3/8" impeller retaining bolts (item 31) using a 9/16" wrench. DO NOT remove the center bolt (item 17).
2. Remove the impeller from the hub.
3. Prior to installing the new impeller, make sure that the fan blade orientation matches that of VIEW P-P for line stringing operations.
4. Install the new impeller on the hub using the 3/8" bolts that were previously removed. Be sure to tighten the bolts before operating.

NOTE: Steps 5-8 are for Hub installation only.

5. Remove the center bolt and set screws. Remove the old hub from the shaft. Make sure shaft is clean before installing new hub.
6. Slide the Woodruff key (item 11) into place on the shaft then install the new hub.
7. Install the lock washer and center bolt (items 30 & 17) on the end of the engine shaft.
8. Tighten the hub to the shaft with the set screws (item 29).

MAINTENANCE

ENGINE:

Follow the engine manufacturer’s instructions with the following exceptions and additions:

1. When changing the oil using the normal method, the lower guard and impeller must be removed.
   a. Remove the guard from the housing by loosening the four (4) attaching bolts and pulling the guard down.
   b. Remove the impeller, change the oil, and then reinstall the impeller.
   c. When reinstalling the lower guard, ensure the proper self locking nuts are used and all fasteners are tightened completely.

2. An alternate method for changing the oil:
   a. Drain all fuel from the engine tank and carburetor.
   b. Remove the oil cap and dipstick.
   c. Slowly drain the oil through the oil fill tube by tilting the Smoke Blower and engine assembly towards the oil fill opening. Care should be taken to ensure all oil flows from the oil sump to the corner of the engine and through the fill tube.

FASTENERS

Check all fasteners frequently. Ensure the fasteners are properly installed using self locking nuts and thread locking compound. Vibration during normal usage with small gas engines can cause the fasteners to loosen.

The Cherne Smoke Blower uses a combination of self locking nuts and thread locking compound on all fasteners to help minimize these problems.
LIMITED WARRANTY

Manufacturer warrants all products manufactured by it will be free from defects in material and workmanship for one (1) year following the date of manufacture. If any of the goods are found to be defective, such goods will, at manufacturer's option be replaced or repaired at manufacturer's cost. The parties hereto expressly agree that buyer's sole and exclusive remedy against the manufacturer shall be for the repair or replacement of defective goods as provided herein. (The sole purpose of the stipulated exclusive remedy shall be to provide the buyer with free repair and replacement of defective goods in the manner provided herein. The exclusive remedy shall not be deemed to have failed of its essential purpose so long as the manufacturer is willing and able to repair or replace defective goods in the prescribed manner.) Goods which may be sold by manufacturer but are not manufactured by it are not warranted by manufacturer, but are sold only with the warranties, if any, of the original manufacturers thereof. (This warranty does not cover labor or other costs or expenses to remove or install any defective, repaired or replaced goods.) Manufacturer's warranty does not apply to any goods which have been subjected to misuse, mishandling, misapplication, neglect (including but not limited to use of unauthorized parts or attachments), or adjustment or repair performed by anyone other than manufacturer or one of manufacturer's authorized agents.

Any claim by buyer with reference to the goods sold hereunder shall be deemed waived by the buyer unless submitted in writing to manufacturer within the earlier of (1) thirty (30) days following the date buyer discovered or by reasonable inspection should have discovered, any claimed breach of the foregoing warranty, or (2) thirteen (13) months following the date of manufacture. Any cause of action for breach of the foregoing warranty shall be brought within one year from the date the alleged breach was discovered or should have been discovered, whichever comes first.

LIMITATION OF LIABILITY. Manufacturer's liability (whether under the theories of breach of contract or warranty, negligence, or strict liability) for its goods shall be limited to repairing or replacing parts found by the manufacturer to be defective, or at manufacturer's option, to refunding the purchase price of such goods or parts thereof.

DISCLAIMER OF CONSEQUENTIAL DAMAGES. In no event shall manufacturer be liable for consequential damages arising out of or in connection with this agreement, including without limitation breach of any obligation imposed on manufacturer hereunder or in connection herewith. Consequential damages for purposes hereof shall include, without limitation (including death) to any person, or loss of or damage to property (including without limitation property handled or processed by the use of goods). Buyer shall indemnify manufacturer against all liability, cost or expense which may be sustained by manufacturer on account of any such loss, damage or injury.

DEFECTIVE PRODUCTS POLICY. To obtain performance under this warranty, any product suspected of having a manufacturing defect in materials or workmanship at manufacturer's request must be returned to CHERNE INDUSTRIES INCORPORATED, freight prepaid, for inspection. A returned goods authorization must be obtained before shipping any product back to CHERNE. Call 1-800-843-7584 and ask for customer service.

CUSTOMER TRANSPORTATION REIMBURSEMENT. Whenever CHERNE repairs or replaces a product at CHERNE'S expense CHERNE will reimburse the distributor by credit memo, the same surface freight amount it cost CHERNE to return the warranty items.

The foregoing warranty is in lieu of all other warranties express or implied, including those of merchantability or fitness for any purpose not expressly set forth herein. No affirmation of manufacturer, by words or action, other than as set forth in this language shall constitute a warranty.
